Customer Identity Solution

These materials and any recommendations within are not legal, privacy, security, compliance, or business advice. These materials are intended for general informational purposes only and may not reflect the most current security, privacy, and legal developments nor all relevant issues. You are responsible for obtaining legal, security, privacy, compliance, or business advice from your own lawyer or other professional advisor and should not rely on the recommendations herein. Okta is not liable to you for any loss or damages that may result from your implementation of any recommendations in these materials. Okta makes no representations, warranties, or other assurances regarding the content of these materials. Information regarding Okta's contractual assurances to its customers can be found at okta.com/agreements.

Safe harbor

This presentation contains “forward-looking statements” within the meaning of the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995, including but not limited to, statements regarding our financial outlook, long-term financial targets, product development, business strategy and plans, market trends and market size, opportunities, positioning and expected benefits that will be derived from the acquisition of Auth0, Inc. These forward-looking statements are based on current expectations, estimates, forecasts and projections. Words such as “expect,” “anticipate,” “should,” “believe,” “hope,” “target,” “project,” “goals,” “estimate,” “potential,” “predict,” “may,” “will,” “might,” “could,” “intend,” “shall” and variations of these terms and similar expressions are intended to identify these forward-looking statements, although not all forward-looking statements contain these identifying words. Forward-looking statements are subject to a number of risks and uncertainties, many of which involve factors or circumstances that are beyond our control. For example, the market for our products may develop more slowly than expected or than it has in the past; there may be significant fluctuations in our results of operations and cash flows related to our revenue recognition or otherwise; we may fail to successfully integrate any new business, including Auth0, Inc.; we may fail to realize anticipated benefits of any combined operations with Auth0, Inc.; we may experience unanticipated costs of integrating Auth0, Inc.; the potential impact of the acquisition on relationships with third parties, including employees, customers, partners and competitors; we may be unable to retain key

personnel; global economic conditions could worsen; a network or data security incident that allows unauthorized access to our network or data or our customers’ data could damage our reputation and cause us to incur significant costs; we could experience interruptions or performance problems associated with our technology, including a service outage; the impact of COVID-19 and variants of concern, related public health measures and any associated economic downturn on our business and results of operations may be more than we expect; and we may not be able to pay off our convertible senior notes when due. Further information on potential factors that could affect our financial results is included in our most recent Quarterly Report on Form 10-Q and our other filings with the Securities and Exchange Commission. The forward-looking statements included in this presentation represent our views only as of the date of this presentation and we assume no obligation and do not intend to update these forward-looking statements.

Any unreleased products, features or functionality referenced in this presentation are not currently available and may not be delivered on time or at all. Product roadmaps do not represent a commitment, obligation or promise to deliver any product, feature or functionality, and you should not rely on them to make your purchase decisions.

Welcome to the Okta Customer Identity Solution Release Overview

Q3 2023

Welcome to the Release Overview of Okta's recent feature launches in the Customer Identity Solution.

From Front-Channel Single Logout to Access Scenario Testing Tool, Okta powers streamlined security that factors in access policies and threats to deliver convenient, intuitive experiences that users expect.

Customer Identity Solution

General Availability

Access Scenario Testing Tool (Policy Testing Tool)

Feature of: all products/ Available in: all SKUs

Streamline access scenario testing and generate a comprehensive list of applicable policies for users and groups trying to access a specific application, all without the need to run simulations to help troubleshoot access issues and ensure the seamless deployment of new features into production with confidence.

OIE

Enhanced Security Checks for Unmanaged Device

Feature of: Access Management / Available in: AMFA SKU

Proactively mitigate risk and improve overall security posture by defining access policies based on security posture checks on unmanaged devices.

OIE

Headless Access to Okta AWS CLI

Feature of: Developer Tools / Available in: All SKUs

Enable users to attach the AWS CLI to other headless processes like Continuous Integration and Continuous Delivery. It can work with the existing secrets management process and can be secured to only certain apps and certain operators with access to the app and secrets. It allows interactive and programmatic sessions to coexist with proper authorization.

OIE

Policy type	Matched rule	Rule matched on	Result summary
Global session policy	Full time employees (priority 1) Default rule (priority 1)	Group: Full time employees	Access: Allowed Verification requirement: Any 1 factor
Authentication policy	Any 2 factors Default rule (priority 1)	Application: Salesforce Catch-all: Any request	Access: Allowed Verification requirement: Any 2 factors
Authenticator enrollment policy	Full time employees (priority 1) Default rule (priority 1)	Group: Full time employees	Disabled authenticators: -

Access Scenario Testing Tool

Customer Identity Solution

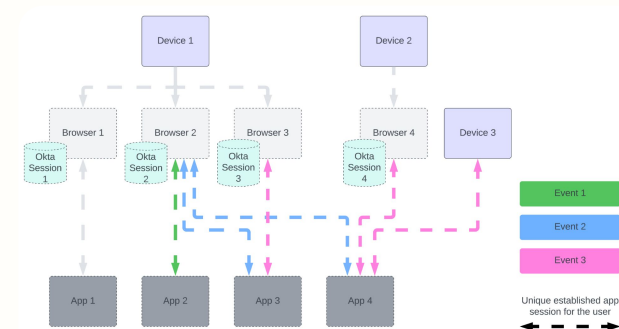

Early Access

Front-channel Single Logout (SAML/OIDC)

Feature of: Core Services / Available in: SSO SKU

Reduce security risk, protect user privacy with Front-channel Single Logout (SAML/OIDC). Allow end-user to logout of multiple apps or services simultaneously by initiating logout from a single application.

OIE

Front-Channel Single Logout (SAML/OIDC)
