Okta + Slack

Making Collaboration Easier and Enhancing Security

Collaboration is essential for organizations of all sizes, bringing onsite and remote employees, partners, and contractors together. Okta, the leading independent identity provider, integrates with Slack, the modern workplace hub, to seamlessly connect people. Together, they enable secure sharing, archiving, and searching of key documents and conversations—all protected by robust identity management. With a rise in breaches – 80% of which are related to credentials[1] – and increased regulatory pressures, this partnership is more critical than ever.

Through Okta's Secure Identity Integrations, Slack empowers organizations to deliver exceptional cloud-native productivity and collaboration experiences. Slack's integrations paired with Okta's industry-leading identity and access management capabilities ensure seamless security, compliance, and lifecycle management for every user.

Building Better Collaboration

Increase workforce productivity:
Okta empowers your workforce with seamless access to all Slack workspaces through Single Sign-On (SSO), eliminating login headaches and cutting password resets by 80%[2]. Automated Slack app deployment and mobile SSO ensure your employees stay secure and productive, anytime and anywhere—so they can focus on what matters most.

Decrease IT time and cost:
Okta simplifies IT management with automated Slack provisioning via SCIM and pre-built connectors and templates to set up common needs in seconds. New users from Active Directory, LDAP, or HR systems are instantly set up with enriched profiles and assigned to the right workspaces. Automated workflows secure sensitive data, while SAML/SCIM reduces IT tasks by 50%, saving time, cutting costs, and boosting efficiency.

Centralized, secure collaboration with Slack Enterprise Grid:
Slack Enterprise Grid unites your organization with secure, connected workspaces, while Okta simplifies user management with centralized controls. Instantly assign employees to the right channels by pushing Okta groups to Slack, and manage permissions with ease. Built for security, Grid meets FINRA and HIPAA standards and supports eDiscovery, DLP, and EMM—empowering secure, seamless collaboration at the speed of business.

Mitigate security threats in real-time:
Enforce Zero Trust policies that instantly detect and respond to threats by revoking access for compromised accounts or suspicious activity with Okta's Universal Logout. This proactive, real-time protection safeguards users, secures sensitive data, and keeps your applications safe—stopping threats before they cause harm.

What are Secure Identity Integrations?

As credential-based security breaches rise, it's time to go beyond basic identity and access management. Okta offers the deepest integration capabilities to create end-to-end protection across your enterprise's most used applications.

Learn how to stay ahead of the latest identity security threats and scale effortlessly.

How Okta and Slack Work Together
With Okta's deep Slack integrations, organizations can elevate security, productivity, and operational efficiency like never before:

- Organize teamwork with shared, searchable workspaces that keep everyone aligned.
- Simplify access with SSO and say goodbye to password reset hassles.
- Automate provisioning to keep sensitive data in the right hands.
- Instantly assign users to the right channels with JIT and Okta group automation.
- Enrich Slack profiles with key details like location, time zone, and manager for easy access.
- Instantly revoke access across all devices when security is compromised.

Over 4800 companies today use Okta with Slack. They continually leverage advanced capabilities that deliver end-to-end protection and automation while strengthening Identity defenses and driving IT efficiency.

Looking for more integrations?

Learn how you can apply these deep capabilities across your tech stack with 8,000+ integrations in the Okta Integration Network.

"Slack has been virally adopted, across our company, organizations, and teams. With over 155 workspaces and 34k members, the Okta + Slack integration has made it easier to manage Slack users at scale across all of 21st Century Fox, so our teams can collaborate more efficiently and effectively."

—Christian Sosa, Associate Director of Cloud and SaaS, 21st Century Fox

Case Study
Funding Circle uses Slack for internal communications. It once would have taken weeks to deploy a new application to 750 users around the world. With Okta Lifecycle Management, Slack was deployed within seconds, which meant employees were able to securely collaborate right away.
